Patrick Coughlin Named Principal of St.Germain & Associates

WESTBROOK, Maine (January 6, 2010) – St.Germain & Associates, Inc. is pleased to announce that Patrick Coughlin has joined Mark St.Germain and Scott Collins as a principal of the firm.

Since joining St.Germain in 2002, Coughlin has been a key project manager, senior scientist and marketing director at the firm. His projects have included biomass fuel and ash quality programs for numerous energy clients, comprehensive compliance systems and environmental site restoration for clients in the petroleum, commercial and higher education sectors, and permitting and design of petroleum and waste management facilities.

Mark St.Germain, founder and President of St.Germain & Associates, was enthusiastic about Coughlin becoming a principal: “Pat is a great asset to our team. When our clients have needed help with complex issues, he has been there when it counts using his environmental experience to provide cost-effective solutions. Naming him as principal reflects the confidence that we and our clients have in his abilities.”

Mr. Coughlin has over 20 years of experience in the environmental industry and received his bachelor’s degree in chemistry and environmental studies from Bowdoin College. He lives in Brunswick, Maine.

St.Germain & Associates, Inc. is an engineering and consulting firm providing senior level management to clients in the areas of site planning and development, energy, petroleum and waste management, site investigation and restoration, water resources and environmental compliance. More information is available at www.stgermain.com.
